Academic Studies

- Mathematics degree at *Universitat de Valencia*.
- Bachelor in Advanced Mathematics at *Universidad de Murcia*.
- PhD in Algebra at *Universitat de Valencia*.

Skills

- **Programming Languages:** C++, Matlab, Gap, FreeFem++, R, Python, mySQL.
- **Writing programs:** Office, \LaTeX , Lyx.
- **OS:** Windows and Linux.
- **Languages:** Spanish (native), English (B2), Catalan (native).
- **Udemy courses:** Artificial Intelligence and deep learning, 100 days of Python, Optimization with Python, TensorFlow 2.0.
- **Other:** Financial accountability, Value investing.

Working Experience

- Internship at IA Talentum working on power consumption prediction models using *R* and mySQL.
- Research grant for differential equations (undergraduate level).
- Academic research and teaching experience at university level.

Personal Interest

Great interest in the development of mathematics with special emphasis on theoretical branches as well as programming, especially data science, predictive modeling and similar. I value flexibility and the possibility of working from home, as well as an environment in which I can learn and share.
